

TECHNICAL BULLETIN

ULTERION[®] 255 S

CLEANING AGENT FOR COTTON

PERFORMANCE FEATURES

- Minimizes backstaining
- Compatible with all enzymes
- Highway efficient wetting agent

Product Description

Ulterion[®] 255 S is a formulated non-ionic compound made from a combination of highly efficient wetting agents, dispersing agents and surfactants designed for use in textile garment processing.

Ulterion[®] 255 S is compatible with all classes of enzymes commonly used in garment processing. This includes amylases, cellulases and lactases.

Ulterion[®] 255 S is highly effective in minimizing backstaining of indigo dyes on stone-washed denim garments. It can be used in desizing operation in the stonewashing step or in the final clean-up at the end of the process.

Typical Properties

Appearance	Clear to hazy colorless to light amber liquid
Ionic Type	Non-Ionic
Characteristic Odor	Mild
Density	7.8 – 8.8

Application Methods

Ulterion[®] 255 S is typically applied at 0.1-0.05 % OWG.

MARKET USES

- Denim processing

Handling / Storage Stability

Ulterion[®] 255 S should be stored between 20°C and 35°C to insure maximum shelf life. For best results, this dispersion should be used within one year. There are no special storage requirements for *Ulterion[®] 255 S*.

Product Safety

When considering the use of **Ulterion International** products, please refer to the latest Material Safety Data Sheets (MSDS). If you require an MSDS for this product; please call Customer Service or your **Ulterion International Representative**
